**UNDER THE
CANOPY**
ANIMALS OF THE RAINFOREST

Step into the rainforest and encounter the fascinating animals that call it home. Learn about the important role rainforest ecosystems play in our world and the ways we can help protect them. Blending interactive programming with unexpected animal interactions, the experience encourages curiosity, discovery, and connection throughout the space.

Themes

Visitors will learn the characteristics of a rainforest including the wide variety of plants and animals that call rainforests, home. They will also learn where rainforests are located and how much of the Earth is covered by rainforests and why that number has decrease over time and what that means for humans and animals alike. There is a strong focus on conservation so visitors will come away with actions they can take to support rainforests and their regrowth.

Key Components
